		* converted from yards # .24 was added to hand time	Updated May 29, 2015	

* indicates that the distance was converted from yards to meters
indicates a hand time that had .24 added to it. I only did this with school records since the majority of the performances were accomplished before FAT became available. All hand times were rounded UP to the nearest 1/10 of a second, which was standard procedure at the time.
f indicates an FAT time
